Are there any Learning Outcomes you (respondants) would take out? Specify which and why.

Are there any Learning Outcomes you (respondants) would include? Specify which and why.

what about tourism? why it is not included in the form one teaching objectives.
vegetation - animal life and comparing biomes is too much for form 1 students.
locate physical and human features of malta .. mediterranean Europe and the world -- don't you think it's too much for an 11 - 12 year olds ..let's just focus on malta and the Mediterranean for a start.

most of these topics are not suitable for the mind of a 12-13yr old student ... some of these topics are done in the option groups and it is sometimes even very difficult for them to understand eg. effects of a tropical storm, to understand high and low pressure, soil profiles,
urban landuse models -- too technical for them
fieldwork in form 2 ?? cannot be done if one has quite a number of classes it will take weeks to take all the students .. cos it is impossible to take whole classes out in one visit, so it will take weeks to do fieldworks for the whole form ...

There are concerns by geography teachers in my team that the work done should be clearly explained to teachers, for example in level 7 point 2 there is mention of software. The teachers want to know what kind of software. Point 6 same level there is the world biomes it should be specified as like this, it is too vast a project.

Comment in general:
I would divide all the learning outcomes in each level into the following subject focus headings such as those used in the syllabus:
- Map Reading and Interpretation
- Weather and Climate
- Landforms and Processes
- Socio-Economic Human Systems
- Environmental Concerns
- Location and Places
This will facilitate the flow from the syllabus to the learning outcomes.

The general learning outcomes within Level 7 summarise in brief what students study within Form 1 & 2. It can be seen positive as it leaves space for the teacher to explore the learning outcomes as needed, but on the other hand it isn’t a very specific guide for teachers.

There are some learning outcomes related to topics that are covered within these years which are left out:
- Deserts
- Maltese context: tourism, settlements, traffic, etc
- Fishing

**General comments or concerns about the subject:**

I would include learning outcomes related to Fieldwork in both Levels 8 and 9. Students learn various skills while working on their fieldwork.

There are learning outcomes on the following topics missing:
- Tourism
- Knowledge on location and places on World, Europe maps.
- Plate Tectonics: Volcanoes, Earthquakes
- Farming

**General comments or concerns about the subject:**

Topics covered are mentioned in the learning outcomes but very briefly and thus not highlighting all the knowledge the students will achieve by the end of the year.

**General comments or concerns about the subject:**

Too many for one lesson a week.
Time is needed for practical work and groupwork.

Allocating time for outdoor fieldwork for applying skills learnt.
Recognition and awareness of our surroundings - natural landforms, weather observation, map skills etc
